

# MULTI ENGINEERING

Your Ally in Cybersecurity and Compliance

# ABOUT US

## Mission

Our mission is to empower organizations to protect their data, ensure regulatory compliance, and build resilient operations through expert guidance, advanced technologies, and streamlined processes. By combining deep industry expertise with a strategic, risk-based approach, we help businesses identify vulnerabilities, meet regulatory requirements, and implement sustainable security frameworks tailored to their unique needs.

## Who we are

We are a dedicated IT services company focused on delivering trusted cybersecurity and compliance services to businesses of all sizes. Our team combines technical expertise with deep regulatory knowledge to help organizations protect their systems, safeguard sensitive data, and meet industry-specific compliance requirements through a blend of managed services, strategic consulting, and innovative technologies.

# Our Cybersecurity and Compliance Services

## PCI DSS

We provide end-to-end PCI DSS compliance services to secure your payment environments. We will guide you through gap assessments, remediation, and audit preparation. We help implement and maintain controls that protect cardholder data and reduce breach risks. Stay compliant, avoid penalties, and ensure customer trust with our proven PCI DSS solutions.

## SOC 2

We deliver comprehensive SOC 2 compliance services tailored to your business needs. Our team supports you through readiness assessments, control implementation, and audit preparation. We align your systems with SOC 2 Trust Services Criteria: Security, Availability, Confidentiality, Processing Integrity, and Privacy. Build customer trust and demonstrate your commitment to data protection with our expert guidance.

## ISO/IEC 27001

We help you achieve ISO/IEC 27001 certification with end-to-end support and expert consulting. Our services include risk assessment, ISMS implementation, documentation, and audit readiness. We align your security practices with international standards for managing information risk. Ensure data integrity, meet client expectations, and strengthen your global credibility with us.

## INFOSEC PROGRAM

We design and implement comprehensive Information Security Programs tailored to your business. Our services cover policies, risk management, incident response, and ongoing security governance. We align your program with industry standards and best practices. Protect your data, meet compliance requirements, and build a resilient security culture with us.

# WHY CHOOSE US?

In a fast-moving digital world, you need more than just tools. You need a partner who understands the risks, the regulations, and how to keep your business safe. At MultiEngineering, we take the complexity out of cybersecurity and compliance. We work closely with your team to understand your business, identify risks, and build strong, scalable defenses that keep your data safe and your operations compliant with industry regulations. Whether you need help passing audits, securing your network, or managing sensitive data, we provide expert guidance, hands-on support, and smart tools that make security and compliance simple and stress-free.

**Trust &
